

**International Workshop on
Environmental Aspects of Coal Ash Utilization
Tel Aviv, Israel
December 15th – 16th 2009**

Economic Benefits of Coal Ash Utilization, the Economy Viewpoint

D. Langer

Abstract

- Description of the main beneficial use of Coal ash, in the Portland cement and the Concrete industries.
- Indicative calculations and economic aspects of the benefits to the national economy and to the users. Today's benefits are a direct result of the recognition that the coal Ash is a resource, as opposed to the years it was related as an environmental nuisance, and was mainly dumped to the sea.
- The reuse of Coal Ash as a factor that eliminates sand mining and other environmental damage.
- Summary of a vast economic research that was done in the past –"Benefits of Coal Ash reuse in the Building Industry - versus additional Radiation risks".
