

Hans - Joachim Feuerborn - Curriculum vitae

Hans-Joachim Feuerborn Studied Metallurgy and Material Science at Aachen Technical University. In 1986, he started his scientific work at the University Technical University Aachen on reuse of industrial residues in construction products and continued as a Chief Engineer in the Department of Binder Materials (cement, lime, gypsum) and as a Consultant in ceramics and binder materials and for reuse of industrial residues.

In 2000, he started his work as an Adviser for by-products from coal-fired power stations at VGB PowerTech, the European Technical Association for Power and Heat Generation. Furthermore, he is serving as a Technical Officer and from 2008 as the Secretary General for ECOBA, the European Coal Combustion Products Association. He is actively involved in several European and German standardisation committees.
